WELCOMING THE ERA OF PEOPLE, CONNECTED

Hello People,

We are BYTE. We will keep you connected.

People are connected. We believe that internet is the bridge, a transportation where you can move and connected one to each other

We are BYTE. We ride the wave.

People are connected with their needs. To reach what they believe and keep standing with their vision.

We are BYTE. We are you that are connected.

High speed connection and capability to reach and beyond the infinity

Will you join us?

OUR VISION, WHAT WE BELIEVE

What we believe is:

"*Access to connectivity facilitates freedom of speech and expression, equitable entry to education, the right to freedom of conscience, and various other benefits. Our conviction is that every individual worldwide deserves unfettered, reliable, secure, and swift internet connectivity.*"

By providing connectivity we can reach what we believe and what we stand for.
Leading people for a better future. Making the world better and connected.

WALK WITH SURGE, PROVIDE INTERNET FOR ALL

We walk together with Surge to connect people.

PT. Solusi Sinergi Digital, Tbk or the one named "Surge" was founded under the laws of the Republic of Indonesia and is situated in South Jakarta. The company was established under the name of "PT Lucaffe Indonesia" as stated in the Deed of Establishment of PT Lucaffe Indonesia Number 21, dated September 6th, 2012, drawn up in the presence of Humberg Lie, S.H., S.E., M.Kn., Notary in North Jakarta. The Company's business activities focus on fiber optic network infrastructure, digital products and services, and fiber optic networks.

Surge offered its shares to the public for the first time and was listed on the Indonesia Stock Exchange on 30th December 2020 with the ticker code WIFI.

Because of the increasing need for connectivity in line with the development of the digital ecosystem in Indonesia, Surge through its subsidiary PT. Integrasi Jaringan Ekosistem ("Weave") is collaborating with PT KAI (Persero) through a fiber optic network development project along railroad tracks on Java Island. This infrastructure development is expected to meet the connectivity needs of all residents of Java Island and in the future, the Company will also expand its reach to Sumatra Island. In 2019, KAI and Weave drafted a long-term contract for the installation, operation, and management of fiber optic along KAI's 4,000-kilometer railroad.

The company strengthens its commitment to growing a sustainable business which is currently developing in the construction of fiber-optic networks on toll roads and highways so that the total fiber-optic network that has been deployed by Surge currently reaches 5,724km, Surge can help and contribute to Indonesia, especially in the development of digital ecosystems, improving the quality of education and public services, as well as the development of digital economy in Indonesia.

SURGE BUSINESS MODEL

Surge, as BYTE business partner mainly focuses on these six pillars as the company's backbone and revenue generating ecosystem.

- **Leased Core (Dark Fibre)**

Leased Core services provided specifically for customers who need capacity flexibility and high security by operating their own fiber optic network infrastructure according to their needs.The total fiber optic offered is 144 cores which span a distance of 4000 km.

- **Leased Line (Bandwidth)**

Bandwidth Sales Service refers to renting access to internet capacity/bandwidth on a monthly or yearly basis. Internet service providers (ISPs) and corporations can access internet bandwidth services at various PoP (Point of Presence) owned by the company along the railroad tracks on the island of Java. The minimum order for this service is 1 Gbps with a minimum service contract of 1 year and monthly payment terms.

- **Colocation**

Server storage services and other IT equipment at the Company's Edge Data Center facility. Colocation services provide a safe and reliable environment for storing and maintaining clients' servers and other equipment, as well as the necessary infrastructure to power and connect them to the internet network via a fiber optic backbone along the train lines on the island of Java.

- **Content Delivery Network**

Content delivery networks (CDN) are the transparent backbone of the Internet in charge of content delivery.

Surge's Content Delivery Network (CDN) offers the best in speed, performance, and resiliency by building content caching, load balancing, and accelerating website load times, high in-quality video streaming, and file download times. CDN makes your application faster and more reliable for users in every part of the world.

● Tower Fiberization

Bring your communications to new heights with our Tower Fiberization services. Our state-of-the-art fiber optic technology provides your business with lightning-fast internet and data speeds, as well as unparalleled reliability. By fiberizing your towers, you can expect faster data transfer, improved network capacity, and enhanced coverage, making it the perfect solution for businesses that rely on high-speed internet and data connectivity.

● Fiber To The Home (FTTH)

Collaborating with one of the leading internet providers in Indonesia, Surge aims to deliver the biggest and cost efficient Fiber To The Home internet product. This product will integrate all of SURGE's connectivity ecosystem in the island of Java. This product will launch in 2024 and will be the backbone of BYTE's ecosystem as a whole.
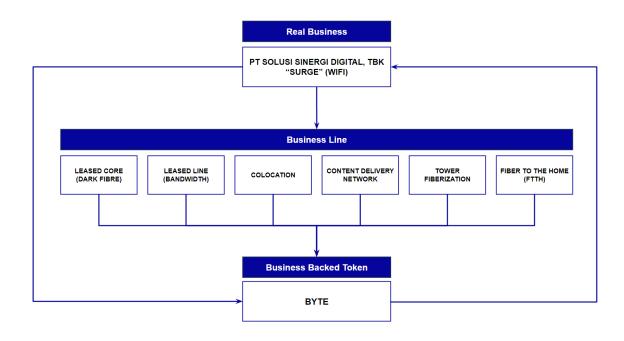

BYTE, THE FIRST INDONESIAN REAL BUSINESS BACKED TOKEN

Real World Assets (RWA) in crypto refers to the tokenization of tangible assets that exist in the physical world, that are brought on chain. Also include the growing issuance of capital market products on-chain, where real business are tokenized and offered to retail customers.

BYTE is the First Indonesian Real Business Backed Token that connects and enhances with our partner, Surge (PT Solusi Sinergi Digital, Tbk) on their product and business line. This kind of cross business model elaborate more transparency and integrity on the product development side especially the adoption of blockchain technology

Why are we the first?

- Surge as a public company listed in Indonesia Stock Exchange (IDX: WIFI) enhances with blockchain technology to increase business liquidity and transparency. We're make sure that every Surge business can grow as you expect and more
- As we're growing, BYTE business backed token is not just an assets that backed with Surge business but also gains more benefit from the business program

BYTE ROADMAP

PHASE 1   **BYTE INTRODUCTION**

- Smart Contract Audit
- Launch BYTE Wallet
- Global Exchange Listing
- Indonesia Exchange Listing
- Exclusive Benefit Holders Program

PHASE 2   **BYTE ECOSYSTEM**

- BYTE Contacts
- BYTE Swap
- BYTE U
- BYTE Academy

PHASE 3   **BYTE EXPANSION**

- Join to Tokenized Asset Coalition, a Global RWA association
- Real World Assets Token Exchange Development Kick Off
- Tokenization Bridge Development
- BYTE Trajectory (Blockchain network by BYTE)

BYTE TOKENOMICS

General BYTE Tokenomics

BYTE TOTAL SUPPLY: 168,000,000		
Token Allocation		**Total Allocation**
INVESTORS	60%	100,800,000
ECOSYSTEM DEVELOPMENT	15%	25,200,000
TREASURY	15%	25,200,000
LIQUIDITY PROVISION	7%	11,760,000
ADVISORS	3%	5,040,000

In BYTE, the adoption of Real Business and Tokenization is such a thrill challenge. We're noticed that transparency has become the real deal and factor for us running this project. We are crafting the tokenomics not only for the basis of numbers but also we are considering our ecosystem to get more productive and have good performance.
